

## SportsMan Price Changes

Peak Software Systems is dedicated to producing quality software solutions at affordable prices. When compared to other niche software packages, our SportsMan and SportsMan SQL products are a great value. SportsMan Legacy has been around for a long time and it has been years since there has been any change in price. In addition, we have released SportsMan SQL and there has only been one price increase since its release, but we continue to add new features and enhancements regularly to make sure that you are getting the most out of it.

With ever-increasing operating costs, it is occasionally necessary to increase prices. We are committed to keeping those increases to a meager 5% and to notifying our customers six months in advance of any increases.

It is necessary to increase the maintenance pricing for SportsMan and SportsMan SQL. In addition to the increase, we have decided to give customers who choose a twelve month maintenance contract a price break over choosing a six month contract.

The price of SportsMan Legacy will increase to be the same as SportsMan SQL due to the cost of supporting a product with a declining user base. This stands as a statement of our continued commitment to our faithful customers, contrasting the typical policy of software vendors to discontinue support for products that have been deemed "end-of-life."

The new pricing will be as follows:

Module	6 Month Maintenance	12 Month Maintenance
Core	\$399	\$789
Internet	\$269	\$529
Login *	\$119	\$219
Membership	\$269	\$529
Point of Sale	\$269	\$529
Inventory *	\$269	\$529
Attendance *	\$269	\$529
Additional Seats (each) *	\$59	\$109
OnGuard Backup	\$199	\$379

\* – Applies only to SportsMan SQL since SportsMan Legacy does not offer this module or option.

The new pricing changes will take effect for renewals after January 1st, 2012. Peak Software would like to thank you for your support and understanding. We are committed to making SportsMan SQL the best value in the industry and these changes enable us to ensure that happens. If you have any questions, please let us know.

## Facility Season Dates

Now you can add an availability date range to a facility to make it seasonal. You will find the new option at the bottom of the facility definition window. Go to *Define > Facilities/Parks* and select the facility you wish to modify. Click on *Edit Selected Facility/Park* to view the facility definition screen.

At the bottom of the screen in the *Scheduling Restrictions* section, select *Season: Only* and enter in start and end availability dates. Now, that facility will only be available for reservation within that date range, but will be available for viewing all year round.

## Financial Export Option

SportsMan SQL now supports exporting financial data for use with external financial applications. For a nominal one time fee of \$500, you can enable this functionality which will allow you to customize a delimited text file with various financial information for import into your accounting software.

The one time fee covers the setup and training on the export as well as any modifications or adjustments that need to be done in order to work with your accounting software.

The great thing about the financial export is that we have integrated it into a step of financial processing that you are already doing. Once you've specified how you want the output of the data, you simply create the export file when you do your deposit batches in SportsMan SQL.

Make sure your accounting software has an import option and give us a call if you are interested in this new functionality.
