

Happy Holidays from all of us at Peak Software Systems. We wish you a wonderful Holiday Season and we hope to continue to serve you for many years to come!

New ActivityReg Updates & Development

Peak Software is excited to announce that ActivityReg is currently under development that will accommodate any device your customers may utilize to access ActivityReg and register online (desktops, laptops, tablets, phones etc...). We don't have an exact release date as of yet, but in order to provide this functionality and enhancement, all SportsMan customers will need to be migrated to the current ActivityReg on January 18, 2016.

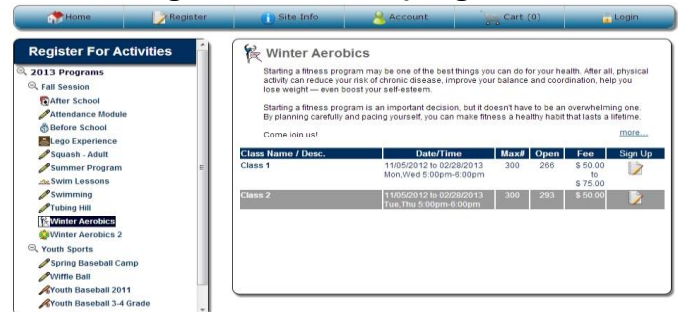

Legacy ActivityReg Is Being Depreciated

The current ActivityReg (widget-based website) has been available since June of 2013 at no additional cost, but many customers have continued using the old legacy version. The current ActivityReg pages bring a fresh and current look, along with an easier registration flow and better customer experience. The widget based web customization tools will also help you design and manage your ActivityReg pages, links, pdf files (brochures/guides), images, and slideshows.

Legacy ActivityReg

Current Widget Based ActivityReg

If you have already updated, nothing will change. For all others, we have two migration paths.

1. Your current site will be automatically updated to the default ActivityReg site (no customization). All of your programs and facilities will be available for registrations, but in the current ActivityReg. You may preview the new layout by going to ActivityReg.com and selecting "View Demo".
2. Contact Peak Software support to schedule a time to allow for any customization desired on your ActivityReg site before the default rollover date occurs on January 18, 2016.

**Please contact us with any questions you may have regarding this transition.
Thanks again, and Happy Holidays!**
