

## Message from the President

As 2016 ends and we look forward to 2017, we wish you and your staff a wonderful holiday season. We appreciate the opportunity to serve you and thank you for choosing Peak Software.

*Charlie Warrell, President & CEO*

## ActivityReg Goes Mobile

We are proud to announce a major enhancement to ActivityReg for patrons who use a smart phone to register. Starting in late October 2016, when you access ActivityReg.com you get a true mobile optimized layout for registrations. We have now released the complimentary "Mobile Enhanced" version of ActivityReg which can be activated from the software. Customer's love the clean, straight forward style which is modern and trend setting. This new format incorporates state of the art "responsive" technology meaning it automatically reformats itself to the size of the browser. Best of all, most of your custom layouts will work unaltered or with very little rework and all of this is available to you at no addition cost! The response from customers has been overwhelmingly positive and our staff is eager to take you through the process.

Smart Phone*

*ActivityReg.com from a Desktop computer's browser*

## Chip Credit Card Processing

EMV Credit Card processing, chip cards to the rest of us, have become common place at big box stores. We are now in the last stages of testing at select customer sites with state of the art credit card processing readers. These machines look great, and allow you to do chip card processing and even have electronic signature capture, eliminating a lot of paperwork. Expect the full release in January.

## SportsMan's New Look

2016 incorporated a yearlong project of updating the look and feel of the SportsMan application. Brighter screens, larger fonts and intuitive graphics have softened the interface and made it easier than ever for your staff to use and navigate SportsMan SQL.

## Projects for 2017

As the above mentioned projects are completed, it frees us up time to add the new functionality our users are looking for. Even with the rich features SportsMan already provides, our development docket is jammed full of exciting new features you've been asking for.

- *Coach Login* – Allows coaches to see their rosters, access emergency contact information, email and text their teams all from the convenience of their cell phone.
- *Community Calendar* – This marketing oriented calendar will scour your existing database giving your patrons a quick “what’s up and what’s going on” at your recreation center or department.
- *Payment Plan Processing* – Large and expensive activities such as summer camps can be a burden to patrons. This functionality will allow you to schedule credit card or bank withdrawal installments to ease the collections process.

**Please contact us with any questions you may have regarding the new releases & updates,  
And thank you for your continued business!**
